Profile Summary

Forward-thinking Software Engineer with a CGPA of 3.35 from FAST-NUCES. Expert in building agentic AI workflows and scalable SaaS architectures. Proven experience in high-level freelance development, translating complex requirements into production-ready MERN and Python applications with integrated DevOps practices.

Technical Skills

AI & Machine Learning: NLP, Model Fine-tuning, PyTorch, LangGraph, Jupyter, Data Mining
Full-Stack Development: Next.js, React, Node.js, Express.js, Django, Spring Boot, FastAPI
Databases & Systems: PostgreSQL (SQL), MongoDB (NoSQL), Distributed Systems, API Design
DevOps & Testing: Docker, Kubernetes, Selenium, Pytest, JUnit, Git, Linux Shell
Design Tools: Figma, LucidChart, StarUML, Adobe Illustrator

Professional Experience

Freelance Software Engineer (SaaS Products) **2025 – Present**
Remote

- Engineered production-ready features for SaaS platforms using Next.js and the MERN stack.
- Implemented secure authentication and authorization systems and scalable REST/FastAPI backends.
- Automated quality assurance using Selenium and Pytest to ensure reliable client deployments.

VR/AR Development Intern **July 2025 – August 2025**
UTeM Global Project-Based Learning Program, Malaysia

- Developed VR/AR prototypes for interactive learning and immersive UI experiences.
- Collaborated within a cross-functional international team to deliver functional demo applications.

Key Projects

Natural Language Control Layer for CRUD Applications
LangGraph, Python

- Developed an AI framework enabling users to manage web applications using natural language instead of traditional UI flows.
- Architected agentic workflows with LangGraph to decompose intent, validate schemas, and safely execute backend tasks.

Game Vault — Web Library Application
React, Redux Toolkit

- Built a comprehensive game catalog featuring personalized progress tracking and IMDb-style interfaces.
- Optimized state management using Redux Toolkit and implemented modern glassmorphism UI design.

CIRKIT — Logic Circuit Simulator
Java, JavaFX

- Developed a virtual simulator for digital logic design components with real-time state updates.
- Improved user-driven circuit creation through modular architecture and object-oriented design principles.

Education

BS in Software Engineering **2023 – 2027**
FAST National University of Computer and Emerging Sciences (FAST-NUCES), Lahore
CGPA: 3.35
Relevant Coursework: Data Structures, Distributed Systems, Database Design, Linear Algebra
